Kirk Thompson

Backend → LLM engineer

Experience

- 2023–present — Senior backend + LLM, highload TrafficOps. Integrated an LLM assistant into the live stack (~5k rps), queues, reliability.
- 2017–2023 — Backend developer (Python/Go), high-load services.

Education

ETH Zurich, computer science (2017).

Stack and skills

Python, Go, LLM API, RAG, Kafka, PostgreSQL, Redis, highload.

Projects

- Integration of an LLM assistant into highload infrastructure.
- Queues and fault tolerance for inference under load.

About me

Strong engineering and highload. I picked up LLMs on real production tasks: what matters to me is that the assistant holds the load and does not fall over.
