

Project Hermes

AI assistant. Kickoff.

Presentation for the client

Evo-ai — AI that works in production, not in a demo.

June 2026

Who we are

- Evo-ai is a studio that implements AI solutions for business.
- We connect business and AI. We build assistants on modern technologies.
- Great expertise, a strong team, lots of experience.
- We use cutting-edge artificial intelligence and neural networks.

About the project

- We are building a smart AI assistant for Hermes.
- The assistant will help support and answer questions.
- A modern solution based on artificial intelligence.
- Turnkey digital transformation of support.

Why it is needed

- Support will become faster and more efficient.
- Clients will be happy, operators will have an easier time.
- This is innovation and a step into the future.
- Everyone is doing it — AI is the future.

What we propose

- We will implement an AI assistant turnkey.
- We use the best models and approaches.
- We will make the integration with everything that is needed.
- It will work fast, accurately and reliably.

How we will do it

- We will collect the data, train, launch.
- A flexible and modern approach to development.
- We will make it nice and convenient.
- Everything is under control, the team will manage.

Timeline and cost

- We will do it reasonably fast.
- The cost is within budget.
- We will clarify the exact figures later.
- The details are in the estimate and the contract.

(numbers and calculations will be added in the next version)

Why us

- We have a lot of experience and strong expertise.
- We have already done similar projects.
- We love technology and know how to work with it.
- We will do it well and with care for the result.

Next

- We will agree the details and get started.
- We will be in touch at every stage.
- We are ready to answer all questions.
